F. J. Wood, G. Appleyard and Dick Garrett went big game hunting this week—No luck.

Miss Dorothy Langly spent the past weekend at her home. Dorothy is attending school in Calgary.

Mrs Cadman and Mrs. Hunt returned home Sunday after spending the past two weeks in Vancouver and Victoria. Cecil Trumbley of Victoria and Mr. and Mrs. Bill Boyachuk formerly of Carbon wished to be remembered to their friends.

Woman Doctor Relates Her Early Experiences In Northwest

REGINA.—More than half a century ago, when a great part of Western Canada was called the Northwest Territories, Mrs. Elizabeth Matheson was the first woman doctor in that vast region. Dr. Matheson also was the only doctor in a 100-mile area around the Onion Lake Mission when she went there in 1892 with her missionary husband, John Matheson.

Onion Lake is about 40 miles north of the present town of Lloydminster, straddling the Alberta-Saskatchewan border.

She had taken only one year at medical school when she arrived at Onion Lake Mission. The Matheson's chief project then was to conduct an Indian school. But after many requests for medical attention, John Matheson decided that his wife must return to medical school.

Dr. Matheson received her degree

Sweden Interested In Alberta Oil

EDMONTON, Alta.—Swedish engineering skill may unlock the world's untapped reserve of oil, deposited in Northern Alberta's vast Athabasca tar sands.

Klas Book, Swedish Minister to Canada, said in an interview that if present experiments now under way were successful there would be a "tremendous interest in Canada on the part of capital investors in Sweden."

MOSTLY TOP GRADERS

WINNIPEG.—Sixty-five per cent. of Canada's record wheat crop is expected to rate the two top grades—No. 1 and No. 2 Northern—the board of grain commissioners announced. This compares with six per cent. last year and the 10-year average of 70. Last year, only .4 per cent. graded No. 1 Northern and 5.6 per cent. No. 2 Northern.

EAT ANYTHING WITH FALSE TEETH

If you have trouble with plates that rock or creak when you eat—try Brimms Plasti-Liner. One application makes plates fit *snugly* without powder or paste, because Brimms Plasti-Liner hardens permanently to your plate. It relines and refits loose plates in a way no powder or paste can do. Even on old rubber plates you get good results six months to a year or longer. **YOU CAN EAT ANYTHING!** Simply lay soft strip of Plasti-Liner on troublesome part of plate. It is 18 months permanent, easy to use, tasteless, odourless, harmless to you and your plates. Removable as directed. Plate cleaner included. Money back if not completely satisfied. If not available at your drug store, send \$1.50 for reliner for 1 plate. WILDRONT LTD., FORT ERIE, ONT. Dept. K5

Funny and Otherwise

"Is your wife changeable, old man?"

"I've never tried, but I shouldn't think so."

The hardest thing about making money last is making it first.

Man at payroll window, to worker: "Sorry, but with the deductions for the Sunshine fund, social security, withholding tax, hospitalization, saving bonds, union dues, life insurance, and gift fund, you owe us \$6.80."

No matter how low in value the dollar may eventually fall, it will never fall as low as some people will stoop to get it.

Inquirer—Mr. Agony, six months ago I sent my husband out for a loaf of bread, and I haven't seen him since. What should I do?

Mr. Agony—Don't wait a minute longer. Send out for another loaf of bread.

"Get my broker, please, Miss Jones."

"Yes, sir—stock or pawn?"

Junewed: "My wife likes coffee for breakfast while I like tea."

Longwed: "You'll soon get used to coffee."

"Bill got his nose broken in three places."

"Well, if he takes my advice he'll keep out of those places in future."

Sales Manager: "There's a fellow who's going places."

Secretary: "Ambitious fellow, eh?"

Sales Manager: "No. His wife is out of town."

"That's a good idea, ma'am, having soda and water in them bottles with squirts. I've done the scullery floor with them in no time, and there's three left out of the dozen."

PEACE RIVER AREA

Crops Being Damaged By Wild Horses

PEACE RIVER, Alta.—Farmers in the Clear Hills-Dixonville area 40 miles northwest of here have reported herds of wild horses, estimated numbering as high as 500 head, are destroying their crops.

The horses break up into bands of 40 to 50 head when entering grain fields for food.

The situation has existed for sev-

eral years but it is reported getting worse.

The farmers have appealed to the Alberta government for help. Livestock Commissioner W. H. T. Mead is scheduled to meet with them Oct. 7 to discuss the situation.

Under existing legislation, wild horses must be rounded up by the farmers at their expense. After a prescribed period the animals can be sold or destroyed. Sale receipts are used to defray roundup expenses, any surplus going to the government.

GREAT DESTRUCTION

About 90 per cent. of the business buildings in Seoul, Korea, have been destroyed in the four times the city has changed hands since June, 1950.

Why is it best? Quality.

"SALADA" TEA

Some 60,000 Fires, 493 Lives Lost During 1951, Mostly Caused By Carelessness

(Written for The Canadian Press By C. A. Thomson, Dominion Fire Commissioner)

OTTAWA.—Some 60,000 fires, most of them caused by carelessness, took 493 lives in Canada last year and caused property loss of \$76,000,000. All this could have been prevented if Canadians understood that the main causes of fires are their carelessness and their lack of knowledge of simple fire prevention.

Fire Prevention Week, this year from Oct. 5 to Oct. 11, was designed to advise, teach and inspire Canadians to take their responsibility in respect to fire seriously and to apply the knowledge they have gained to the reduction of this dreaded scourge.

A thorough inspection should be made of homes, factories, stores, institutions, assembly buildings and transportation facilities for improperly designed, constructed and installed heating and electrical appliances. Protection should be provided in cases where they are close to combustible materials.

This particularly concerns chimneys, flues, stoves, furnaces, boilers, pipes, oil burners, electric light and power appliances and devices. It applies to handling of hot ashes, coals, open fires, smoking, matches, lights—other than electric—and rubbish.

Responsible citizens know that fire prevention and the protection of natural resources are essential to our living and the prosperity of our people and our country.

It is in our homes that 75 per cent. of the fires and 20 per cent. of the loss occur. It is here that we must observe our responsibility by taking action to correct the deficiency that tends to destroy our lives and property.

In 1951, fire attacked 45,000 homes and caused damages of \$16,958,702; 6,200 stores with a loss of \$22,443,129; 1,800 factories with a loss of \$17,045,215; 3,500 farms with a loss of \$5,549,354; and 800 institutional and assembly buildings with a loss of \$5,892,516.

An analysis of the 1951 fires show that many Canadian structures contain weaknesses which help the spread of fire—ineffective fire walls, poor or no cut-off of vertical and horizontal openings, insufficient water supplies, insufficient fire fighting equipment and man power in fire departments and insufficient fire protection and prevention training.

If you have fire problems, discuss them with your fire chief. He'll give you the kind of advice you need.

Announces System To End Frost-Spoiled Wheat Crop

MONTREAL.—"Dry-sowing", a system which can mean the difference between a full wheat harvest and a frost-spoiled crop, has been discovered by Professor Henri Prat of the University of Montreal, it was announced.

Using a new research tool—the micro-calorimeter—Professor Prat found that Prairie farmers can save four days between the time of sowing wheat and its germination.

Professor Lucien Piche, head of the University chemistry department, said dry-sowing could mean millions of extra dollars in Canadian coffers. Up to now farmers have paid little attention to moisture of grain, so long as it doesn't rot.

Professor Prat made the discovery by measuring the amount of heat given off by dehydrated and hydrated grain when absorbing water and noting the length of time needed for germination.

The heat produced by absorption of water induces germination. The drier the grain the more water is

absorbed and faster germination is accelerated.

The announcement was made in conjunction with the arrival of the micro-calorimeter's co-inventor, Professor Edouard Calvet of the University of Marseilles, who will supervise installation of two more of the machines at the university.

The machine can measure minute amounts of heat and is being used at the university to test the effect of different antibiotics and bacteria. It is used in the study of all physical and biological phenomena involving small quantities of heat.

WART RISK INSURANCE RATE DROPS FOR ASIA
LONDON.—The Institute of London Underwriters decided the Far East is less dangerous than it used to be and cut freight insurance rates for war and strike, riot and civil commotion risks.

VIOLATED LAW
Manufacturers in Sheffield, England, who have turned out thousands of Coronation souvenirs stamped with the Royal Crown learned that they have violated the law and may have to junk their merchandise.

Actions speak louder than words.

Some Butter Bean!

Mrs. Andrew Ferguson, of Providence, R.I., displays a 49 inch, 12 pound butter bean which was grown from seed she purchased last spring. Described in a catalogue as 'gigantic butter beans', the seeds were as big as a lima bean. A farmer friend agreed to grow them for her. The giant above was the largest of the crop.

Pacific Salmon Fishing Is Making A Comeback

OTTAWA.—Canada's once fabulously rich Pacific salmon fishery is coming back into its own. Fisheries scientists now say it may not be too long before the great British Columbia sockeye salmon industry produces again in the abundance of 1913 and earlier years. The sockeye is only one of five types of Pacific salmon but is the most valuable commercially.

The year 1913 is a historic one in the \$50,000,000-a-year salmon industry. It was the year of the last "big" sockeye run before a slide at Hell's Gate Canyon in the Fraser River blocked most of that system's spawning grounds to the fish. From then the Fraser system, the largest salmon producer, went into decline.

Much work has been done since. Fishways have been installed at Hell's Gate. Spawning beds there and in other parts of the province have been protected and new ones started by transplanting. Some of this work has been done by the International Pacific Salmon Fisheries Commission, a Canadian-United

States regulatory body, and some by the Department of Fisheries.

Now the commission says the work shows high promise.

In 1937 only a few sockeye were found remaining in the spawning beds of the Horsefly River, one of the interior tributaries of the Fraser. This year more than 5,000 three-year-old sockeye were observed coming to spawn.

These three-year-olds are early maturing fish which precede the main run of spawning adults and are indicative of the size of the run to come in 1953 in the normal four-year birth-to-spawning death cycle of the salmon's mysterious life.

Not since the Hell's Gate slide have this many three-year-olds appeared in the Horsefly area. It has led commission biologists to predict that next year's run from the Quesnel River—which empties the Horsefly and feeds the Fraser—will be "several hundred thousand sockeye."

Federal Department of Fisheries scientists here agree.

Their main concern of late has been with the more northerly run of the Skeena River, British Columbia's second largest salmon producer. On one of the Skeena's tributaries—the Babine River—the federal men are engaged in a \$1,000,000 slide-removal job.

Engineers have cleared at least two channels to allow early-arriving salmon to reach the spawning beds beyond the slide. The work is still going on.

This fine example of close competitive bidding appeared in the Bridge World. West opened One Club with a part-score of 80, and North's double was the best way of contesting the auction.

South jumped to Two Spades over East's One Diamond. West raised Diamonds twice and South bid Three Spades followed by Four Spades in spite of North's silence. West doubled for a penalty of 800 after the lead of V A and a shift to Q 4 had enabled his side to win the first six tricks.

Four Diamonds is defeated if South leads Q 5, as the play of North's fourth Club removes a dummy trick for the defence. South, in effect, bid the same values three times in trying to save the rubber, and failed to allow for North's double being shaded at the score.

TRYING TO PERSUADE MEN TO GET PERMANENTS

VIENNA.—Austrian hairdressers are trying to convince men that the occasional permanent would do them a lot of good.

The Vienna Hairdressers Association will stage a men's hairdressing contest at its next meeting Oct. 12 and 13.

In the new styles, hair will probably be grown longer with small curls close to the head and at the back.

Avocados are native to South America.

On The Side ■ By E. V. Durling

How shrewd a shopper is your matrimonial mate? Does she know how to determine whether an egg is really grade A? This can't be done by just looking at the egg in the shell. However, when fried, a grade A egg covers only a comparatively small area, the white part is thick and fairly high. The yolk firm and high. Grade B fried eggs cover a wide area. Only small portions of the white parts are thick. The yolks are flattened and enlarged. It has been reported that in some sections grade B eggs are being sold as grade A. So your wife better check the situation.

Starting the Day Right

Women lose their tempers most at people. Men are most inspired to rage by objects. That is when their automobile runs badly or they can't find something or they miss a bus and so on. Tempers of both sexes get most out of hand before breakfast. That is the reason a man and wife should never have breakfast together. The husband is angry at some object, such as having had to shave with a dull blade, and the wife is angry at her husband because he is in an ugly mood about the dull razor blade. So a battle breaks out and the day gets off to a poor start.

Old Stuff, These Flying Saucers

Have you seen any flying saucers in your vicinity lately? If so, it is not necessarily true that your eyes have been deceiving you. There were similar aircraft flying about Britain 34 years ago. During World War I the British developed a type of circular wing aircraft resembling a flying saucer to some extent. However, the British called their plane "The Flying Doughnut". This type of plane was intended for observation purposes.

An Occasion for Dignity

Very frequently you hear a screaming of auto horns and a cavalcade of cars passes by headed by one bearing a sign "Just married", or words to that effect. That sort of thing is childish and corny, if not downright cheap and vulgar. Outside of tossing a little rice in the good old-fashioned way, I think the departure of the married couple from the church should be a dignified one. Also the trip to the wedding party.

Men Are Faster

Am asked the value of the celebrated Hope diamond. Answer is about \$175,000. Writes a young woman: "The female is not the superior sex in every way. The male moves faster. You can see that by the way the men beat women to the vacant seats on buses and trams."

Admission Price: One Salmon

At a film theatre in Alaska, the price of admission is one salmon. The theatre owner is also the proprietor of a cannery factory. The third richest man in the world is a British citizen known as "Mr. Five Per Cent." He is so-called because he has a five per cent. interest in some of the world's most profitable oil leases. Real name is Calouste Gulbenkian. He is said to be worth \$900,000,000!

A-Bomb Rays

Informal Attire For Vacationing Royalty

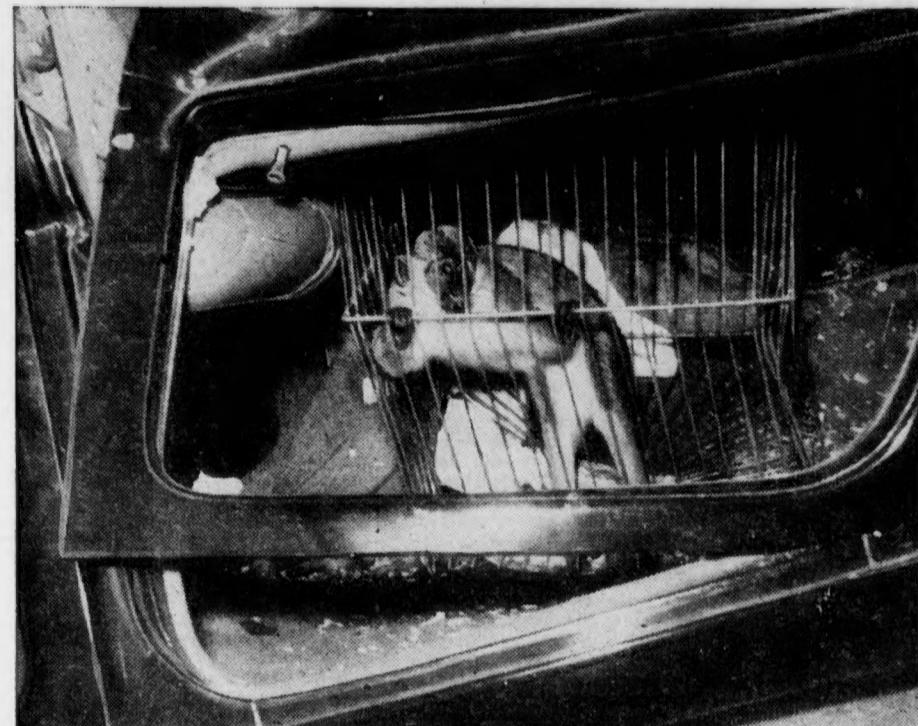

Vacationing at Balmoral Castle in Scotland, the royal family is all for informality as they romp on the spacious grounds. Queen Elizabeth II, wears homey tweeds and stout shoes; her husband, Philip, the Duke of Edinburgh, wears a Norfolk jacket and baggy plusfour pants, while young Prince Charles and his sister, Princess Anne, are clad in slacks and woollen windbreakers.—Central Press Canadian.

TOP GUY—"Rocky" Marciano became the heavyweight champion of the world when he landed a K.O. punch on the jaw of "Jersey" Joe Walcott in the 13th round of a scheduled 15 rounder in Philadelphia Sept. 23.

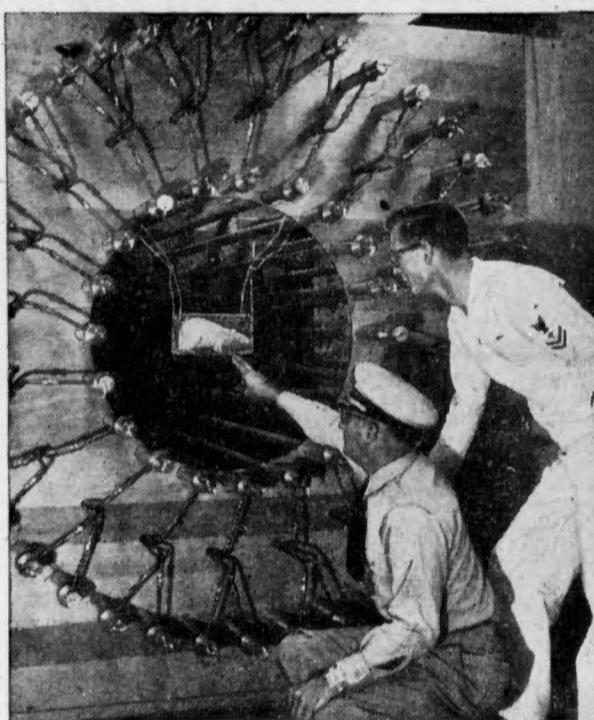

HEAVY BOMBER FLIES ON ONE JET ENGINE — At ceremonies opening Canada's 70,000-square-foot production centre for jet engines, the Avro-Canada plant at Malton, Ont., a heavy Lancaster bomber flies over the heads of the spectators with only one of four engines operating. The demonstration was to prove the power of the Orenda engine on which the government is spending \$66,000,000 to install in the Sabre fighter plane for the R.C.A.F.—Central Press Canadian.

GAZING with panic-stricken eyes through the window of a smashed automobile, this monkey wonders when help will arrive. The monkey was a passenger in the automobile which turned turtle and injured four men—but the monkey was so solidly trapped inside the smashed car he had to wait until the wreck was towed to a garage before he could be cut loose. The mishap occurred in Montreal.

Central Press Canadian.
YUGOSLAV PRINCE TRAINS WITH R.A.F.—Seated in the cockpit of his plane, Prince Nicholas of Yugoslavia prepares to take off from Fair-oaks airfield in England. The prince recently joined the Royal Air Force volunteer reserve and is now in training. He has frequently been the escort of Princess Margaret.

Central Press Canadian.
MICE SUBJECTED TO A-BOMB RAYS—This is the first generator of its kind anywhere. It produces gamma rays similar to those given off in an atom bomb explosion. Designed to give complete uniform total body irradiation of target materials, it was built by scientists of the U.S. navy at Bethesda, Md. Here Capt. R. H. Drager, (left), and N. J. Marbois observe the visible effects on an animal during exposure to irradiation of gamma rays. The main advantage of the new apparatus is that the animal is shot with rays from all sides, just as it would be by an atomic explosion, and the effect of such exposure can be determined.

BUT IT BROUGHT HIM BACK ALIVE — U.S. Navy Lieut. Robert Notz examines the propeller blades of his fighter-bomber which was damaged by enemy flak while over a North Korean target. Flying from a carrier, Notz fortunately was able to bring his plane in for a landing on friendly held island off Korea.—Central Press Canadian.

MILESTONE IN GREEK PROGRESS—King Paul of Greece watches his wife, Queen Frederika, sip the first water at a celebration opening the first pipeline into the Greek village of Mavromati. Housewives previously walked to the nearest stream for their water, but contributions from Greek friends in other lands enabled them to build the pipeline, a significant step in the town's emergence from medieval conditions.—Central Press Canadian.

Lessons From the Olympics

One of the good points of the Olympic Games is that every time they are held there is progress made in the field of skill development and training and conditioning. When preparing for the Games the experts in nearly every country rack their brains in order to develop techniques designed to improve athletic skill. Then, afterwards, they return to their countries and start the same procedure in order to do better the next time.

This time there is more than usual to learn—which is indicated by the fact that so many records were broken. A few of the outstanding lessons we can learn are:

Protein Is Important

The value of extra amounts of protein in the diet of an athlete was demonstrated by the success of the

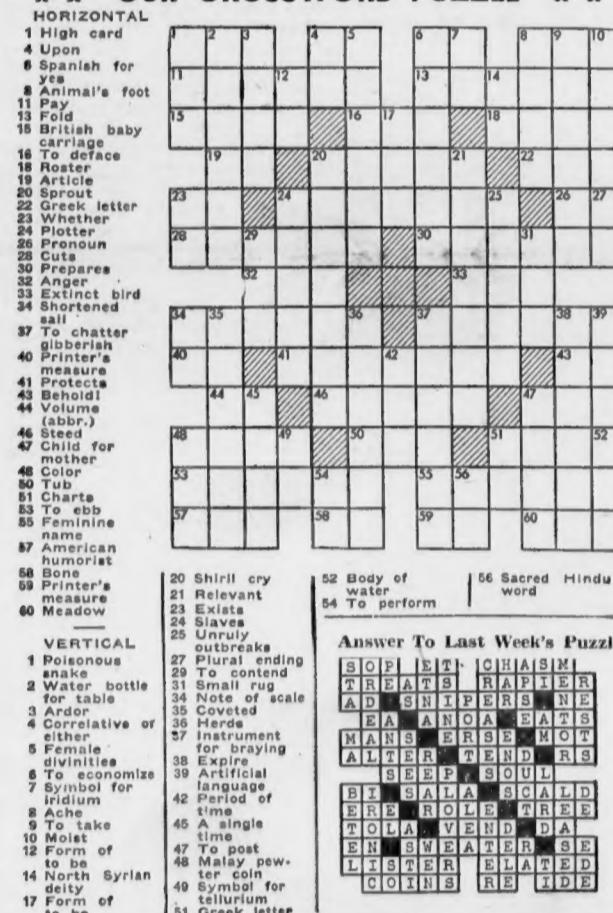

LONG MEMORY

WEYBURN, Sask.—Chan Kay, local cafe proprietor, received a letter with \$5 from Clelum, Wash. The writer said he had received a meal ticket from Chan Kay in 1911 and had not paid for it, but the cafe man said he could not remember the incident.

UNFORTUNATE ACCIDENT

Three women and a man at Kaub, Germany, became enmeshed in a fishing net in the dark and were drowned. Their rowboat had hit the net and capsized. Two other women struggled free.

Weekly Tip

MELTING CHOCOLATE

Much chocolate is wasted, while melting, if it sticks to the bottom and sides of the container. But this can be prevented if the container is thoroughly greased before the chocolate is put into it.

Pioneer Prairie Clergyman Tracks Original West Course Taken By First Whites

REGINA.—Rev. J. W. Whillans, a modern Sherlock Holmes, doesn't think a 261-year-old trail is too cold to follow. The pioneer prairie clergyman has almost completed research to determine the exact course taken by the first white travellers to see the western Canadian plains.

The traveller was Henry Kelsey, a young Hudson's Bay Company employee. Mr. Whillans has written a book he hopes will establish Kelsey in the niche of fame he deserves. The book is hoped to be ready for publication shortly.

Since the accidental discovery of the Kelsey diaries after they had lain 200 years in an Irish mansion, and their subsequent publication in 1929 by the Public Archives of Canada, the almost-forgotten name of Kelsey has risen in prestige.

Saskatchewan was named for him. A monument at The Pas, Man., describes him as the discoverer of the Canadian prairies. The call letters of the CBK station at Watrous, Sask., CBK include a "K" standing for Kelsey.

Aside from the fact that the diaries were lost so long, Mr. Whillans says lack of knowledge about Kelsey is due to uncertainty over the actual path his exploration followed.

Mr. Whillans says that when he operated missions in the Carrot River area in 1907, the unsettled country was much as it was when Kelsey passed through. Numerous passages in the diary seemed familiar.

The parson came from his native Scotland in 1903, before Saskatchewan became a province.

His research has convinced him that the spot in Kelsey's diary referred to as "Deering's Point" on the "Waskashreeseebee" River is actually The Pas, on the Saskatchewan.

From this point, Kelsey made a

DENIMS FOR FALL—Insulated against the whims of the weather with checked doeskin lining. Gay Togs matches the shirt to the lining in this all-Canadian play set for junior.

Edmonton To Hire Irish Policemen

EDMONTON.—Mayor William Hawrelak announced recently that 25 Irish policemen will be added to Edmonton's police force in November. Edmonton imported 13 men from Scotland for the police force in junior.

Mayor Hawrelak said difficulties in finding suitable men in Canada compelled the city to seek applicants from the British Isles for the second time. Edmonton's bid for applicants was handled by the Alberta Government office in England.

Swiftest of all animals over very short distances is the cheetah.

:: APPETIZING RECIPES ::

Devilled Egg and Peanut-Prune Fillings make hearty and tasty sandwiches for the school lunchbox. Be sure to use plenty of butter and filling in the sandwiches, and wrap well in waxed paper. Add fruit and a raw vegetable for color, flavor and food value.

Devilled Egg Filling

Three tbsp. soft butter, 2 tbsp. prepared mustard, $\frac{1}{4}$ tsp. paprika, 10 slices bread, 3 hard-cooked eggs, chopped.

Combine butter, mustard and paprika. Spread on 5 slices bread, using 1 tbsp. butter spread on each slice. Top with chopped eggs, then

with remaining slices of bread. Yields 5 Devilled Egg Sandwiches.

Prune-Peanut Filling

One half cup chopped, cooked prunes, $\frac{1}{2}$ cup peanut butter, $\frac{1}{4}$ cup mayonnaise or salad dressing, $\frac{1}{4}$ tsp. salt.

Combine prunes, peanut butter, mayonnaise and salt. Yields $\frac{1}{2}$ cup or filling for 4 sandwiches.

Winter Shelter For Beef Cattle

ment in this type of shed would seem warranted is the replacement of the straw roof with one of more permanent nature.

Shelters of more elaborate types, says W. N. MacNaughton, Animal Husbandman at the Farm, should be considered only if the building can serve some additional purpose, such as the storage of hay under cover. Even to serve this additional use the building does not need to be an expensive one. A shed of the style described, but of considerable depth, could be used for hay storage with a space of six or eight feet left along the open side. This space would provide ample shelter during the early months of winter and as the hay is fed out more shelter space under cover would be available to the stock. A shed of this nature would lend itself particularly well to methods of self-feeding hay to cattle.

Any cattle shelter should be located on a well drained site where full advantage can be taken of natural shelter. It should be conveniently located in respect to the winter's feed and water supply.

ODDITIES

In The News

Detective W. E. B. Kearney of Fort Worth, Tex., went on vacation after closing the case of a man given a two-year suspended sentence for burglary. When Kearney returned three weeks later, he was assigned to another burglary case. The suspect was the same man.

The man wanted to take out some insurance, he told Loretta Upton, who handles such things at Consolidated Vultee aircraft plant at Fort Worth, Tex. When Miss Upton asked his name, he said, "Guess". When she started to protest, he added "That's right—Herbert L. Guess."

An Alliance, Neb., father bought his small son a fishing pole when the family went on vacation to Colorado. The boy promptly took the pole apart and shook each section. Asked what he was doing, he replied, "I'm trying to find out where they keep the worms."

Josh Winbush, 65, of Memphis, Tenn., has filed suit for divorce on grounds of desertion. He said his wife left him in 1911 "and she hasn't returned yet."

The 18 boys and girls in the Arthur Griser family of Pittsburgh, have a new brother and sister. Mrs. Irma Griser, their 37-year-old mother, gave birth to her fifth set of twins. She also has a set of triplets.

William Barrett, 48, of Evansville, Ind., was taken to hospital for treatment of a stab wound in his thigh, which he blamed on his wife. A few hours after he was sent home, he was back again, stabbed in the shoulder. His wife, he said, was still mad at him.

OUR COMPLETE SHORT STORY

HUNCH PLAYER

By D. P. ANSTY

LOUIE and I stood by the rail studying the racing form. I watched Louie's nervous hand run the stump of a finger down the column.

"There it is," said Louie indicating a horse by the name of Contrary which was running in the fifth. "I'm going to slap the whole bundle right on its nose."

"Why?" I asked indifferently.

"Just a hunch," Louie said. "Mary and Contrary." He said the names as though they meant something. I said that I didn't follow.

He explained, "Mary is my girl, right?"

"Right," I agreed.

"And there is a poem about a girl named Mary who was very contrary and she had a garden," he went on.

I agreed again although I had never heard of any such poem.

"It's as simple as adding two and two," Louie said. "My girl's name is Mary. I put my money on a nag in the fifth by the name of Contrary. And from then on I've got plenty of pending lettuce."

I didn't follow his logic, but said nothing. Gamblers are peculiar people, and I let Louie alone to play his hunch. I had one of my own.

We stood at the rail watching the running of the second race. We were watching with calm disinterest for neither of us had bet any money. Then a pock-marked character slid up to the rail alongside me. It was Beady White.

"Hang on to your purse," said Louie when he saw Beady. This was a sarcasm for Beady had the reputation of being a purse snatcher.

Beady pretended not to hear. "Got anything good in the fourth?" he asked. He stood so close I could smell the cloves on his breath.

Louie said, "Scram, I don't want any sneak thief latching on to me." Beady gave a slight sneer, but took the hint.

"I can hate that guy without half trying," said Louie as we watched Beady edge his way through the crowd. "Snatching a purse is a mug's game. It lacks . . ." He stopped, searching for a word.

"Finesse," I prompted.

"Sure, that's right," he said. "There's no finesse to snatching a purse. Now picking pockets, that's where a guy needs plenty of finesse."

Picking pockets was Louie's specialty, or had been up till the time he had lost two fingers operating a punch press in a war factory. Since then he had turned comparatively honest. I figured it was not only his fingers he had lost but also his nerve. I felt sorry for him because of that, because a pickpocket without nerve

A Pickpocket Without Nerve Is Like a Violin Without Resonance — He Just Isn't Any Good.

is like a violin without resonance—he just isn't any good.

By now the fourth was coming up. I had a hunch I wanted to play so I went to the two-dollar window. Louie tagged along. I placed my bet and joined Louie, who was leaning against a wall studying the form. Only he wasn't studying it.

"Look at that guy," Louie said. "He ain't got finesse."

I looked and saw Beady nudging through a group of people. He was following a fat, perspiring man in a grey suit.

Then it happened. It was so obvious I wondered why the man hadn't noticed. Beady jostled him and slipped his hand into a pocket. It didn't come out empty.

"Clumsy," muttered Louie. "He should stick to purse snatching. Picking pockets needs more finesse."

He was silent for a moment. "Till show Beady how it should be done," he said at length.

"But your fingers," I said, thinking it would be difficult to pick pockets with no fingers to grasp the wallet.

But Louie was gone. I followed, but the crowd moved in between us and I lost sight of him. I got back to the rail in time to see my hunch run a close third. It didn't matter. I was worrying about Louie.

When I saw him after the fifth, he was all smiles.

"How did you do?" I asked.

"Great," he said. "I made a mint."

"I mean with Beady, not the horses," I said quickly.

"Oh, I persuaded him that stealing is dishonest. He gave me the money and I put it back. With finesse, too. The guy never missed it."

"You put it back," I said incredulously, thinking this wasn't the Louie I used to know.

"Sure," he said, "being honest suits me."

"But your fingers," I said. "How . . . ?"

"I still got a left hand, ain't I?" he said.

Inside I felt good, knowing that Louie hadn't really lost his nerve. I watched him as he counted the roll of bills he had won. "Contrary sure paid off," I said with jealousy. "Your hunch was right."

"You don't think I played that crazy hunch," he said. "I played a sure-fire thing. Finesse in the fifth." (Copyright Wheeler Newspaper Syndicate)

CATTLE FROM EAST TO RESTOCK WESTERN HERDS

WOODSTOCK, Ont. — A \$10,000 shipment of cattle has left here to restock western herds, depopulated by foot-and-mouth disease. The cattle, 32 holsteins, two ayrshires and a jersey, will go to Saskatchewan farmers as breeders or starts on new herds.

Do You Know That . . .

Wolves annually kill about 34,000 Canadian caribou, or about five per cent. of the herd. 3007

WESTERN BRIEFS

Turkey Population Increases

SASKATOON.—Saskatchewan had the largest increase in turkey population of any province this year, says Prof. W. J. Rae, head of the poultry department at University of Saskatchewan. The increase here was 95.2 per cent., compared with 47.1 for all Canada.

Fig Tree Grown in B.C.

NANAIMO, B.C.—Vancouver Island had added a new crop to its varied output, but only Mrs. M. Sernagiotti's family will reap the benefits. Mrs. Sernagiotti, a native of Italy, planted a fig tree three years ago and recently it produced sixteen ripened figs. The 16 grew from first blooms, but many other second blooms will not mature because of the lateness of the season.

Housing Shortage

RED DEER, Alta. — Mayor Paul Crawford reports that although building permits worth \$1,500,000 have been issued this year, Alberta's fifth city is experiencing one of its worst housing shortages.

Gaelic Taught

VANCOUVER. — The Vancouver Highland Association announced 30 persons signed up for a course in the Gaelic language to be taught as part of the night school curriculum here. Cost is \$8 a person for weekly two-hour lessons until next March.

P.A. Shows Surplus

PRINCE ALBERT, Sask.—Prince Albert recorded a civic surplus for the third consecutive year. The financial statement for 1951, presented to council recently, showed a surplus of \$6,749.

Inquiry Chief

REGINA.—The Saskatchewan Government announced that Prof. W. B. Baker of Saskatoon will head the six-member royal commission which the government hopes will map out the province's future agricultural development. Prof. Baker is on the staff of the University of Saskatchewan's School of Agriculture.

ARMY TO IMPROVE PAY SYSTEM TO SOLDIERS

OTTAWA.—The system by which the army pays its soldiers may be streamlined shortly, incorporating some British and United States procedures.

The army said the changes may come as a result of the inspection being carried out in Japan and Korea by its chief paymaster, Col. C. W. Ball, director of pay services for the Canadian Army.

The army did not elaborate.

The primrose is not strictly a rose but is a member of the herb family.

Do FALSE TEETH Rock, Slide or Slip?

FASTEETH, an improved powder to be sprinkled on upper or lower plates, holds false teeth more firmly in place. Do not slide, slip or rock. No gummy, gooey, pasty taste or feeling. FASTEETH is alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

May Increase Livestock By New Alfalfa

OTTAWA. — The Department of Agriculture said that the livestock production capacity of Western Canada soon may be doubled through the introduction of a creeping root alfalfa, which is being tested at 10 experimental stations.

Western Canada's livestock production capacity was doubled several years ago with the introduction of crested wheat.

The creeping root alfalfa variety now being tested is a cross of ladak and a Siberian variety. Ladak was brought to Canada from Northern India, and for many years has been the best drought and cold resistant alfalfa variety.

CANADA'S AREA

Canada's total area of 3,845,774 square miles is 236,357 larger than the United States and Alaska combined.

It is estimated that more than half the Eskimos of the world have never seen a snow house.

Yippee! DOUGHNUT TWISTS

Raised light and tender with new fast DRY Yeast!

• There's a new twist in doughnuts — a new thrill in all your baking! Say goodbye to perishable yeast — Fleischmann's Fast Rising Dry Yeast keeps full strength until you use it — fast-acting when you use it. Get a dozen packages — it keeps in your cupboard!

DOUGHNUT TWISTS

Scald 1/2 c. milk, 1/2 c. granulated sugar, 1 1/2 tsps. salt and 1 1/2 c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl 1 1/2 c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 minutes, THEN stir well.

Add cooled milk mixture and stir in 2 well-beaten eggs and 1 tsp. vanilla. Stir in 2 c. once-sifted bread flour; beat until smooth. Work in 2 1/2 c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Punch down dough and roll out into a rectangle, 1/2" thick; loosen dough; roll again to 1/2" thickness. Cut into strips 7" long and 1/2" wide. Fold strips in half, twist them pinch ends together. Arrange

Note: Dough may be cut with an orthodox doughnut cutter; fry the doughnuts and the "holes".

How Scott's Emulsion Helps CHILDREN GROW STRONG, HUSKY!

More than just a tonic!

CHILDREN THRIVE on Scott's Emulsion. When they get run down, catch colds or get sick — see what a difference it makes when you give them Scott's Emulsion. It contains natural A & D Vitamins in natural oil — real "gold from the sea." Helps them maintain resistance. Helps them build strong bones, sound teeth, a husky body! Helps them grow into fine, sturdy, lively children you're proud of! Try Scott's and see!

SCOTT'S EMULSION IS RECOMMENDED BECAUSE

1. It contains natural A & D Vitamins in natural oil — plus added minerals. 2. Easy to take, economical. 3. Four times easier to digest than plain cod liver oil, because of exclusive process. 4. Helps children build strong bones, sound teeth, a sturdy frame.

Today — sure — get Scott's at your favorite store.

Higher Figures For Savings & Loans Reflect Expansion

Reflecting the swift rate of Canada's industrial growth, the Bank of Montreal's 135th annual statement, just published, features record figures for deposits, loans and total resources. Most notable of these are deposits of \$2,147,900,000 — the highest total in the B of M's long history. These deposits comprise the funds of more than 1,900,000 customers from coast to coast.

"Fully half these deposits are made up of the savings of private citizens," was the comment which Clifford Hood, the local branch manager, made in a message issued November 24 by the B of M in reviewing for its customers the highlights of its annual statement.

The report, which is for the year ended October 31, shows net earnings of \$5,668,778 from the operations of its nearly 600 branches.

Alberta Does More for the Health of Its People Than Any Province in Canada

PUBLIC HEALTH SERVICES INCLUDE:

HOSPITAL Alberta's grants to hospitals to cover the daily maternity, pensioners and standard ward programs now total over \$4 million dollars per year. Old Age and Invalid Pensioners and relatives of Mothers, Allowances, and their dependents receive in addition to hospitalization, medical, dental and eye services. The province also provides Hospital Construction grants for new hospitals or additions.

LOCAL PUBLIC HEALTH The provincial government assists cities, towns, villages and rural municipalities in handling their public health responsibilities such as school health services, medical programs, dental, clinical, health education and control of sanitation. In communities where no medical service is available, the province provides 60 percent of the cost of a Municipal Nursing Service.

MENTAL HEALTH The province has augmented its mental health hospital program with the establishment of Guidance Clinics for the purpose of assisting parents, schools, courts, etc.

Alberta TB Death Rate 2nd Lowest

Alberta's tuberculosis death rate is now second lowest in Canada, it was announced today by C. Robt. Dickey, general secretary of the Alberta Tuberculosis Association. Figures for 1951 just published, show Alberta to have a rate of 15.5 per 100,000, second only to Ontario with 12.6. 152 Albertans died of tuberculosis in 1951.

Deaths from TB throughout Canada reached a new low record of 3,422, a rate of 24.5 per 100,000, lowest in history. Denmark home of the Christmas Seal, has the lowest rate among countries, followed by Holland, U.S.A., and Canada.

Mr. Dickey pointed out that only ten years ago Alberta's death rate from TB was 50 percent higher than that of Saskatchewan, and Alberta was fourth lowest. Alberta gradually overtook and last year passed Saskatchewan, which has now dropped to fourth position, with Prince Edward Island having third lowest death rate.

Incidence of Tuberculosis still, however remains high, Mr. Dickey commented. 18,000 TB patients are

now under treatment in Canadian Sanatoria, compared with 12,000 ten years ago. He said, "It is obvious that we must intensify our campaign for prevention through early diagnosis." One of the best means yet discovered for finding unsuspected cases is the routine chest X-ray of hospital admissions. We hope that the 1952 Christmas Seal sale will supply us with enough money to carry on with additional hospital X-ray installations. 1952 TB sale opens November 17th.

My Bank Reports to you for 1952

There are three parts of our annual report that I think would particularly interest you:

DEPOSITS: Because of your confidence, and that of 1,900,000 other Canadians in all walks of life, the B of M holds more than two billion dollars in deposits. Fully half these deposits are made up of the savings of private citizens . . . hard-earned dollars that mean a backlog of money for their use. At the end of the Bank's year, on October 31st, 1952, total deposits stood at the record figure of \$2,147,900,483.

LOANS: During the year, your Bank made many thousands of loans to business and industrial enterprises for production of every kind — to farmers, fishermen, oil men, miners, lumbermen and ranchers — to citizens

IT'S a good report, especially because it reflects the story of hundreds of communities "MY BANK" lives and works in across the land . . . indeed, the whole Canadian story of solid progress for the past year.

And it's a report you can be proud of, for it's about the money you have on deposit at the B of M. Throughout the year, your Bank keeps that money hard at work — expanding, improving and pioneering Canadian enterprise of every description and size . . . financing Canadians of every calling and building Canada in every sense. You not only help yourself when you save at the B of M . . . you also help your country.

of every calling, and to Provincial and Municipal Governments and School Districts. At October 31st, B of M loans amounted to \$712,179,846 — the highest figure in the history of the Bank.

INVESTMENTS: Always keeping a good proportion of the money on deposit in quickly available form, your Bank has \$987,563,535 invested in high-grade government bonds and other public securities which have a ready market. This money helps to finance government projects for the betterment of Canada and the welfare of her people. In addition, the B of M holds \$121,116,603 in other securities — mainly short-term credits to industry.

My Bank has just completed its 135th year with assets amounting to \$2,286,477,930 — the highest figure in its history. The B of M's growth is part of the growth of all Canada and of this community, and I am proud of the place my customers have in this story of progress.
